Product NEWS LiteConsole XPRS

LITECONSOLE XPRS

Prolyte Group is pleased to unveil the latest incarnation of its renowned performance platform, LiteConsole.

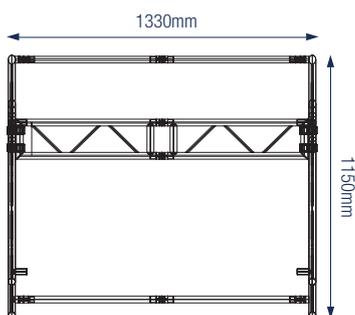

XPRS combines all the most desirable features of LiteConsole in a sleeker, lighter package. The new design makes the system even easier to assemble – it now takes one person just a matter of minutes. The innovative folding frame design means the LiteConsole XPRS will flat pack and fit into an average car, thus leaving plenty of room for other equipment.

LiteConsole XPRS is an extremely versatile podium structure that offers a portable and high-visual-impact solution for any number of applications from live musician and DJ performances, to corporate AV presentations, exhibitions, conferences and retail environments where it makes an extremely eye-catching stand.

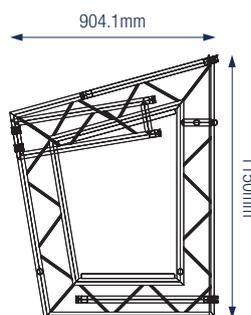

LiteConsole XPRS modules comprise just six primary easy-to-connect sections. Standard modules are designed to house a logo panel, although this open space could feature a 50" PLASMA screen, back-lit corporate logo, LED panels, starcloth, or any other form of messaging.
